

## Mathlantis Notes

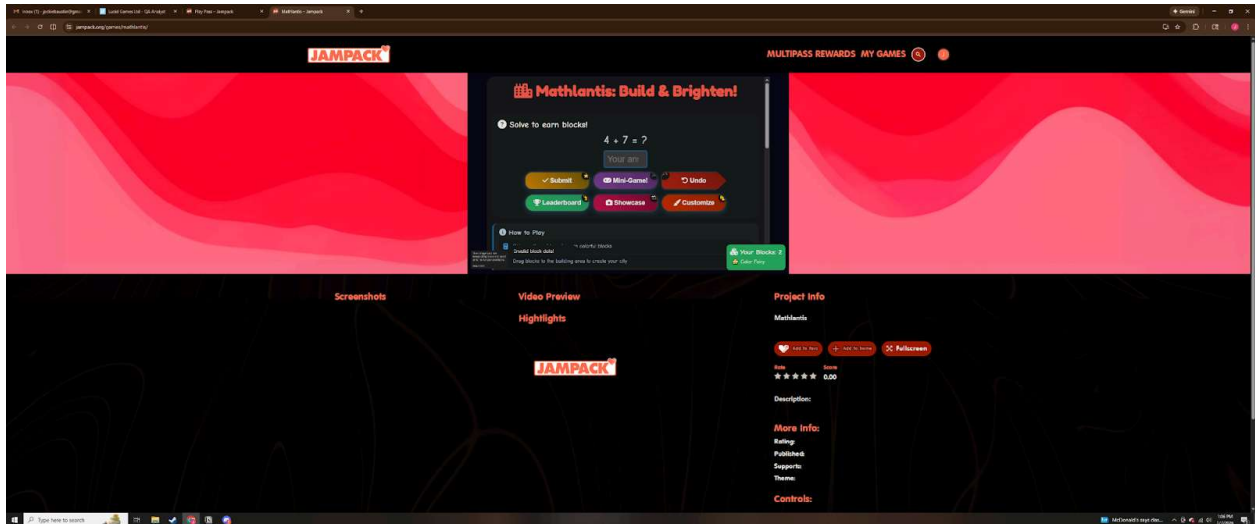

Getting an 'Invalid Block Data' error when I attempt to move blocks.

There seems to be an issue loading this image.

Small thing, but it looks like the icons on the buttons are getting cutoff? Text in the textbox is getting cutoff too.

Last thing. Unsure what the “Build Castle”, “Build House” etc., are supposed to do? They don’t seem to be doing anything at the moment. Just gives me a “Building ...” message at the bottom.
